Da der er mange forhold som spiller ind, er der ikke nogen fast sammenhæng mellem kornstyrke og spredbarhed, under gode spredforhold kan nedenstående dog anvendes som vejledende.

KORNSTYRKE MAX SPREDEBREDDE

OP til 3 kg Max 16 meter med nedsat vingehastighed

3-5 kg 24-30 meter

Over 5 kg 30-48 meter
